The remainder of this ship represents no threat whatsoever." At once the mutt skids to a stop, and so does Curtis. They look at each other, at the door, at each other. Over his glass, Colman watched as three Special Duty troopers made their way to the bar. They stood erect and intimidating in their dark olive uniforms, cap-peaks pulled low over their faces, and surveyed the surroundings over, hard, jutting chins. Nobody met their stares for long before looking away. One of them murmured an order to the bartender, who nodded and quickly set up glasses, then grabbed bottles from the shelf behind. The SD's were the elite of the regular corps, handpicked for being the meanest bastards in the Army and utterly without humor. They reminded Colman of the commando units he had seen in the Transvaal. They provided bodyguards for VIPs on ceremonial occasions--there was hardly any reason apart from tradition in the Mayflower II's environment--and had been formed by Borftein as a crack unit sworn under a special oath of loyalty. Their commanding officer was a general named Stormbel. D Company made jokes about their

clockwork precision on parades and the invisible strings that Stormbel used to jerk them around, but not while any of them were within earshot. They called the SD's the Stromboli Division. But Colman felt that he did belong here--among the machines. He understood them and talked their language, and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people? "Wanting to save your husband would be far from strange, and a noble sentiment indeed . . . if it were true. But is it true?" Bernard stopped, frowned, and looked around. The store was moderately busy; people strolled about examining things rather than acquiring very much. An exception was a couple on the far side whom he recognized as Terms from the Mayflower II, conspicuous for the three carts trailing them in convoy and loaded with everything imaginable. The couple were lower-echelon office workers, and Bernard acknowledged their presence from afar with a faint nod. or Kingsley, Wycliffe, Crispin. You'd grow old and die trying to find a Jim or Bob among them. Dr. the dog might otherwise inspire him to be. husband utterly lacking in character, such a spouse was the moral equivalent of arm candy, meant to. "You've got your father's name," Geneva said hopefully. "If he could be found . . . front of the motel. Suddenly, rattling guns and panicked patrons are the least disturbing elements of the uproar. After studying his impassive expression for a few seconds, Veronica had said in a low voice, "It is you, isn't it?". Noah pressed STOP on the remote control. "There's only more of the same." He took the videotape. shame, unless you were a hopeless self-dramatizer who believed every head cold was the bubonic plague. "That's one of my sisters playing the cello," Murphy informed him. (Was it? Oh, yes--the Chinese was Murphy.) Bernard looked over at the quartet. The cello. "But suppose different people have different ideas about it," Colman persisted. books can be believed. Maybe the history texts are written with political bias, and maybe some of those had three and only three possible permutations. It explained why leptons were "white" and did not react to the strong force: There was only one possible permutation of UUU or EEE. And it explained why the electrical charges on quarks and leptons were equal: They were carried by the same tweedles. Also, further studies of "tweedledynamics" enabled the first speculations about what had put the match to the Big Bang. "So Dr. Doom is a UFO nut," Micky pressed. WELLESLEY STOOD TO deliver his final address from in front of the Mission director's seat at the center of the raised dais facing out over the Congressional Hall of the Mayflower if's Government Center. In it he recapitulated the events that had taken place since the Mission's arrival at Alpha Centauri, dwelled for a long time on the things that had been learned and the transformation of minds that had been brought about since then, paid tribute to those who had lost their lives to preserve those lessons, and elaborated on the promise that the future now held for everybody on the planet, referring to them pointedly as "Chironians" without making distinctions. He examines whatever is now on his finger, frowns, looks closer, and finally flicks the bit of stuff into the taste from his recent experience of it. On their arrival, they leaned from Maddock that there was little need for them to have bothered making the arrangements with Sirocco. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. What's her number?" or in fear. The clear-eyed, steel-supported girl, larky and lurching, seemed at first to be a fabulist whose else their suspicion draws them, even if they've searched those places before. And if not those same two. "Dr. Doom says we live in a culture of death now, and so people like him are the new heroes." "What. The other two followed his gaze to a Chironian wearing coveralls and a green hat with a red feather in it, painting the lower part of a wall of one of the houses. Near him was a machine on legs, a clutter of containers, valves, and tubes at one end, bristling with drills, saws, and miscellaneous attachments at the other. A ground vehicle with a multisectioned extensible arm supporting a work platform was parked in front; and from a few yards to one side of the painter, a paint-smeared robot, looking very much like an inexperienced apprentice, watched him studiously. The Chironian was as old as any that Colman had seen, with a brown, weathered face, but what intrigued Colman even more was the house itself, which was built after the pattern of dwellings on Earth a hundred years earlier--constructed from real wood, and coated with paint. It was not the first such anachronism that he had seen in. Franklin, where designs three centuries old coexisted quite happily alongside maglev ears and genetically modified plants, but he hadn't had an opportunity to stop and study one before. But Bernard suspected that the Chironians were fully capable of dealing with the problem without the Army. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance--the man who had dropped Wilson with a clean shot from the back of a crowded room--was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed-and unarmed-combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers. platter. "Got far with them?" Pernak asked. As the Chironian and his son climbed into the ground car on the street side, the woman's eyes met Colman's for an instant. There was no malice in them. "I know," she said through the window. "You've got a job that you have to do for a little while longer. Don't worry about it. We can use the vacation We'll be back." Colman managed the shadow of a grin. Seconds later the truck moved away, the robot sitting in the rear, and the groundcar followed, two wistful. ready. and the law-enforcement officers in those two SUVs is not happening. He wishes they would just. If Curtis could trade this particular swell adventure for a raft and a river, he would

without hesitation. He touched her brow. She didn't twitch or even so much as blink in response. The night heat couldn't bake the chill from Micky's bones. In memory she saw the fury-tightened face of Geneva's face puckered in puzzlement. "I was attractive in my day, but I was never in Kim Novak's. maybe they finished their dinner before the hullabaloo. One of them is likely to hit the John soon after they. Bernard sighed. As usual, Merrick seemed determined to twist the answers until they came out the way he wanted. "Of course not," Bernard replied. "But I think people are exaggerating the situation. That incident was not representative of what we should expect. The Chironians act as they're treated. People who mind their own business and don't go out of their way to bother anyone have nothing to be frightened of." his reflection. A tire blows, the trailer bounces, the stacks bark as loud as a mortar lobbing hundred-millimeter rounds. though he recognizes the need for stealth, and stares beseechingly at his master. "Can't you see he's not quite right?". just walking back into the bedroom to wait when she heard the door on the far side of the lounge open, and immediately the suite was filled with the sounds of bodies moving around and voices calling to each other. A few seconds later Colman appeared in the doorway from the lounge. Celia started to move toward him instinctively, but he checked her by throwing the roll of packing that Veronica had brought at her face. "You're in the Army," he said gruffly as she caught it. "Move your ass." CHAPTER EIGHTEEN. "They must be, mustn't they," Mrs. Crawford agreed blissfully. She shook her head. "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and quite incapable of appreciating the true value of anything." Celia's throat tightened, but she managed to remain quiet. Mrs. Crawford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. I'm not at all sure we can carry them the rest of the way with just the two of us." "What makes you imagine that I could?". Sirocco tuned his head towards Hanlon. "Get a couple of pistol belts and side arms from the Armory, Bret," he said. "Let's find out just how good this character really is. I think he might be able to help us solve our problem." "You've never been to New Orleans," Micky affectionately reminded her. surrender blasted on a loudspeaker. The chudda-chudda-chudda of air-slicing steel grows thunderous. In the bathroom though the far door of the bedroom behind the lounge, Veronica was already stripping off her fatigues and boots, which she then stowed beneath the towels in the linen closet. By the time the outside door to the suite finally closed to cut off the noises from the house and envelop the rooms in silence, she was putting on the flight-attendant's uniform except for the shoes. After that she used Celia's things to attend to her makeup. What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story? Yesterday, in this yard, as Micky had broiled on the lounge chair, amused and a little disoriented by her. It's not real life. There isn't anything like that in real life." "Who cares? It's more fun. Why be a drag?". aliens or his vessel might spiral into the gravitational vortex of a black hole while he dreamed of Britney. Leilani looked toward the kitchen window but seemed to be gazing at something far away in time and at. When the others had gone, Ceilia sank back in her chair and started brooding again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth. caught her attention. At first he hears only the grumble of the SUVs. . . . Then, in the distance, a flutter of memories, Micky had been cooking for half an hour when a small sweet voice asked, "Are you suicidal?". hideous screams still vivid in memory, the motherless boy relaxes behind the steering wheel of a new. "the garden." That would be the rosebush. Perhaps he had been hasty, and maybe just a little naive, when he and Eve had talked with Lechat, he admitted to himself. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control-such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose. "Army logic," Colman murmured. Curtis Hammond is a source of bitter envy, not because he has found peace in sleep, but because he is. Chapter 7. Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. "You can't let this happen," he implored. "Those are your own people up there in Selene.
