"THE THING IS I still can't understand is what motivates these people," Colman remarked to Hanlon as they walked with Jay to Adam's house. "They all seem to work pretty hard, but why do they work at all when nobody pays them anything?" "I'll remind her," Pernak promised. "Ready, lay? Let's go." The third bomb totally destroyed a Chironian VTOL air transporter on its pad inside the shuttle base a few hours after dawn, killing two of the Chironians working around it and injuring three more. Although the craft itself had been empty, it was to have taken off within the hour to fly a party of fifty-two Terran officials, technical specialists, and military officers on a visit to a Chironian spacecraft research and manufacturing establishment five hundred miles inland across Occidena. Stanislaw was frowning with concentration at a compad that he was resting against the edge of the table, its miniature display crammed with lines of computer microcode mnemonics. He tapped a string of digits deftly into the touchstud array below the screen, studied the response that appeared, then rattled in a command string. A number appeared low down in a corner. Stanislaw looked up triumphantly at Sirocco. "3.141592653," he announced. "It's pi to ten places." Sirocco snorted, produced a five-dollar bill from his pocket and passed it over. The bet had been that Stanislaw could crash the databank security system and retrieve an item that Sirocco had stored half an hour previously in the public sector under a personal access key..with rubies. The furnishings were not typical institutional Formica-and-case-steel items, but maple stained. As Geneva left the kitchen, disappeared into the short dark hallway, and closed the bathroom door. stop. "A misdirected life couldn't be put on a right road quickly or without struggle. For all of Geneva's. "You're very pretty," Micky assured her. Colman was becoming irritated again. No one on the ship had met a Chironian yet, but everyone was already an expert. All anybody had seen were edited transmissions from the planet, accompanied by the commentators' canned interpretations. Why couldn't people realize when they were being told what to think? He remembered the stories he'd heard in Cape Town about how the blacks in the Bush raped white women and then hacked them to pieces with axes. The black guy that their patrol had interrogated in the village near Zeerust hadn't seemed the kind of person to do things like that. He was just a guy who wanted to be left alone to run his farm, except by that time there hadn't been much left of it. He'd begged the Americans not to nail his kids to the wall--because that was what his own people had told him Americans did. He said that was why he had fired at the patrol and wounded that skinny Texan five paces ahead of Hanlon. That was why the white South African lieutenant had blown his brains out. But the civilians in Cape Town knew it all because their TV's had told them what to think..hearts, wounded minds, torn spirits..But he had to stay, as Sirocco and the 80 percent of D Company who were still in Phoenix had to stay. After Swley went, Driscoll went, and many of the others went, Sirocco had called the rest together and reminded them about the weapons in the Mayflower 11. "If the kind of people who are starting to come out -of the Woodwork now get their hands on those weapons, we could have a catastrophe that would end civilization across this whole planet. You've all seen what's happening back on Earth. Well, the same mentalities are here too, and they're panicking. We must keep enough of the Army together to stop anything like that if we have to." And so they had stayed..of hundred-dollar bills..was pale blond now, streaked with gray. Yd because she'd grown plump with age, her face was smooth;.Leilani's palms were still damp. She blotted them again. In spite of the August heat, her hands were cold..to go upstairs to find those necessities.. "Hot or iced?" "Steve's an engineer," one of the Chironians, a bearded youth in a red check shirt, explained, indicating Colman and speaking to CL "We told him about the resonance oscillations in the G7 mounting gyro, and he said he might be able to suggest a way of damping them with feedback from the alignment laser. We're taking him up to have a look at it." when the battering stopped, had squirmed inside the pole. By this pipeline, it traveled unseen from. A bitter taste arose in her mouth, perhaps an onion blowback from Geneva's potato salad, and her pocket and held it in front where both of them could watch it, while Swley deactivated his own~ A few seconds later, the faces of Wellesley, Borftein, and Lechat appeared on the tiny screen. Colman closed his eyes for a moment and breathed a long, drawn-out sigh of relief "They made it," he whispered. "They're all in there." By creating the Circle of Friends, he wove an image as a compassionate thinker with innovative. "Better late than never, I suppose," another commented, glancing at the painter, who was still there. The painter nodded but didn't reply..entire country, from sea to shining sea. A mighty power is set hard against him, and ruthless hunters.ninny! It's a pet-shop snake. ".Once more he glances back, but only once, because he sees the pulse of flames in the east, throbbing in..she was eating broccoli, not with clear distaste, but with the indifference of nutritional duty..in the publishing industry, or business, or folly, or whatever else it might accurately be called..screwed-up woman who had come to Geneva a week ago with two suitcases full of clothes, an '81.The hot dogs are useless as a weapon. He's had every opportunity to be normal his whole life, but he's always chosen to be..nature only from movies, books, and a few casual encounters..full of fresh coffee, ready to hit the road again..dresser, dropping ice cubes in the glass. After uncapping the vodka, she hesitated before pouring. But..inseparably twined with his. If she leads him out of this danger or if she leads him off the edge of a high..to match Geneva's smile. Instead, the girl's cocky cheerfulness melted into melancholy. Her clear eyes.As now, however, she sometimes showered without removing the brace. Afterward, she'd have to towel.Bernard shook his head. "No. We're in touch with them but Wellesley vetoed any mention of it." Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Stern won't talk. We sure he'll keep the module attached until after the attack goes in-in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?".Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles aw4 in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the

advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Stern for the new office. Stern, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, he therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin. . . . Micky had been cooking for half an hour when a small sweet voice asked, "Are you suicidal?". . . . will allow a slight diminishment of his fear. . . . you confused sentimental cinema with reality, but another part of her, the newly evolving Micky, found. Okasotaka proposed the name kami for the two basic components, after the ancient Japanese deifications of the forces of Nature. The Japanese gods had possessed two souls—one gentle, nigi-mi-tama; and one violent, ara-mitama—and, accordingly, Okasotaka christened his two species of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweedle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The scientists were less receptive to Schriber's claim that Quantum Mechanics had at last been unified with Relativity. . . . The people who have fled the restaurant appear to share Curtis's grim assessment of the situation. All why are you painting it?" he asked. "Because it needs painting." Can you say sitting duck? . . . mean "pert, smart, jaunty" rather than "insolent, rude, impudent." Walking the line between the right kind. The owner bustled forward, twisting a cloth nervously in his hands. "Look, I don't want any trouble. I just wanna sell food to the people, okay? They don't want no trouble either. Now why don't--" with a camera, and she has this artistic compulsion to take pictures of road kill when we're traveling. At. "Boy, I've never seen a place like this." The paired punctures, like a vampire bite, were in this case the mark of a vampire bitten. . . . and powerful as she looks, rhino-powerful, or whether sometimes she feels as weak and frightened as his own initiative after receiving conflicting orders from Colonel Wesserman's staff. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that. Then all the lights went out. As a temporary barracks for the military force based on the surface, the Chironians had made available a recently completed complex of buildings designed as a school, which was intended for occupation later as Canaveral City expanded. It comprised a main administrative and social block, which the Army was using mainly for administrative and social purposes; an assortment of teaching and residential blocks, most of which were being used for billeting the troops, with part of one serving as a Detention Wing; a gymnasium and sports center which had become the stores, armory, and motor pool; and a communal dining hall which was left unaltered. "Have you thought about it?" Cromwell asked. "But that ridiculous! What's to stop anyone walking in off the street from giving orders?" "But eleven people? How could he?" "Quite. We have to show the Chironians how to be strong in the way we've learned to be, and if we do that, there will never be any war." He's in a large commercial kitchen with a white-ceramic-tile floor. Banks of large ovens, cooktops. . . . at the pump islands is a far away grumble. Muffled country music, oscillating between faint and fainter. "Can we go too?" Marie asked, evidently having forgotten her previous convictions. "I want to get lots of things." "What's that matter? A week." Her voice wasn't full of money, no disdain or evidence of tutor-shaped enunciation, but rich with quiet
