I will? when the authors keep politics out of their stories. But they never do; in fact, it seems absolutely impossible to write anything without immediately making all sorts of assumptions about what human nature is, what good and bad behavior consists of, what men ought to be, what women ought to be, which states of mind and character are valuable, which are the opposite, and so on. Once fiction gets beyond the level of minimal technical competence, a reviewer must address these judgments of value. Generally, readers don't notice the presence of familiar value judgments in stories, but do notice (and object to) unfamiliar ones as "political." Hence arises the insistence (in itself a very vehement, political judgment) that art and politics have nothing to do with one another, that artists ought to be "above" politics, and that a critic making political comments about fiction is importing something foreign into an essentially neutral area. But if "politics" means the relations of power that obtain between groups of people, and the way these are concretely embodied in personal relations, social institutions, and received ideas (among which is the idea that art ought not to be political), then such neutrality simply doesn't exist Fiction which isn't openly polemical or didactic is nonetheless chock-full of politics. If beauty in fiction bears any relation to truth (as Matthew Arnold thought), then the human (including social and political) truth of a piece of fiction matters, for aesthetic reasons. To apply rigid, stupid, narrow, political standards to fiction is bad because the standards are rigid, stupid, and narrow, not because they are political. For an example of (to my mind) profound, searching, brilliant, political criticism, see Jean-Paul Sartre's *Saint Genet*. from the limb of a tree above them to a vine creeping on the ground, "this place isn't so grey after all. Look closely.. "I'm afraid I have to say they're a liability. Lucy will be needing extra food during her pregnancy, and. "No, nothing," said Smith. "That's all right, Jack, thank you." He broke the connection. After a moment he turned to the breadboard controls of the device and changed one setting slightly. In the screen, Peg turned and walked backward out of the office. When he turned the knob the other way, she repeated these actions in reverse. Smith tinkered with the other controls until he got a view of the calendar on Jack's desk. It was Friday, June 15? last week.
