Jay nodded and pointed to the view of one of Chiron's moons, which was showing between the clouds up near one of the corners. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. ~I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago." There was no repentance or remorse in her eyes when she looked at him. "It's none of your business anymore," she hissed. "How I choose to have fun is my affair and my life." Everybody looked at Colman again, this time with a new interest. A different mood was taking hold of the room, and it was affecting the people on the screen, who were leaning forward and listening intently. So far it was just an idea, but already it was beginning to hook all of them. . . . spine, rolling her head, spreading her arms, the woman stretched as languorously as a sleeper waking. "Think of it like the phase-changes that describe transitions between solids, liquids, and gases," Pernak said. "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules." "Don't you want to come along?" Bernard asked Jean. "It would get you out and give you a break." . . . baked earth still radiated stored heat. Besides, the air wasn't vibrating with the hum of an angry swarm. . . . On the other side of the fire-door, Bernard dropped his tools and ran back to the front lobby of the Communications Center, praying that the alarm hadn't been raised from there. Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began sounding from the stairwell nearby. . . . "You know, walking around the park in a costume, having your photo taken with people. I wanted to be." "You know what I think?" Micky asked. . . . gazing at the starry sky. She seemed to be a young girl dreamily fantasizing about true romance or filled. Maybe something hideous does lurk in there. Perhaps awaiting Curtis is a discovery far more disgusting. Jesus, he thought, he was sick of the system. It went back a lot longer than twenty years, for what was the Mayflower II but an extension of the same system he'd been trying to, get away from all his life? lay was beginning to feel the trap closing around him already. And none of it was going to change--ever. Chiron wasn't going to be the way out that Colman had hoped for when he volunteered at nineteen. They had brought the system with them, and Chiron was going to be made just another part of it. "Thank you, sir." It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next. The aircraft touched down softly, and a pair of double doors slid open halfway along the side nearest to the reception party. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Laid out neatly along the floor behind them were two rows of plastic bundles the size of sleeping bags. Sirocco had already known the story, but it would have been out of order to say anything. Stanislaw's transfer to D Company had followed an investigation of the mysterious disappearance from Brigade stores of tools --and electrical spares that had subsequently appeared on sale in the Home Entertainment department of one of the shopping mart. Farnhill's staff had given up trying to get the Chironians to provide an official list of who would be greeting the delegation. In the end they had simply advised the Kuanyin when the shuttle would arrive and resigned themselves to playing things by ear after that. The Chironians had agreed readily enough, which was why the orders issued that morning had called for a reduced alertness level. Kalens's delegation had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and ceremonies. . . . Curtis Hammond, the original, might have allowed her to have juice in the past. The current Curtis. "No offense taken," Noah said. In addition to surprise, however, the boy has Old Yeller. And the dog has teeth. Curtis has teeth, too. "Got far with them?" Pernak asked. "And exactly what is that supposed to mean?" Stern demanded. "It's happened," Hanlon told him. "Kalens is dead. We found him inside the house, shot six times. Whoever did it knew what they were doing." . . . maintenance ladders, and catwalks. There was no other way through or round the bulkhead. The only route forward from the Hexagon was through the lock. . . . Inside the room, the captives looked around in surprise as muffled thuds sounded just outside the door. The steward who had just brought in the evening meal opened the door, and soldiers in battledress poured in. Wellesley gasped as he saw Lechat with them. "Paul!" he exclaimed. "Where have you been hiding? You're the only one they didn't pick up. What-". This was nice. Quiet. Placing a nonstick cotton pad over the punctures. Opening a roll of two-inch-wide. "Does he expect you tonight?" Stern inquired curiously, although Celia couldn't avoid a feeling that he already knew the answer. She shook her head. "Where are you supposed to be?" "Oh, that locomotive!" lean looked at lay. "Are you working on it again?" . . . Sinsemilla, she'd have this third snake to worry about. There's no way to flee outside when you're. "Oh, there's a lot of studying I've got listed--general engineering with a lot of MHD, then maybe I'll see if I can get into something at Norday for a while. Later on I might move out to the new place they're talking about." "It's a pretty house," Hanlon said after another short silence. . . . THE MOVIE SHOWING on the wall screen in the dining area of the Fallowses' upper-middle-echelon residential unit in the Maryland module was about the War of 2021, and Jay Fallows was overjoyed that it had reached an end. The Americans were tall, muscular, lean bodied, and steely eyed, had wavy hair, and wore jacket-style uniforms with neckties, which was decent and civilized. The Soviets were heavy jawed,

shifty, and unscrupulous, had short-cropped hair, and wore tunics that buttoned to the throat, which meant they wanted to conquer the world. The Americans possessed superior technology because they had closer shaves. "I can see your point to a degree," Pernak said eventually. "But people continue to accumulate possessions long after they've ceased to serve any material purpose because they satisfy recognition needs too." For the first time a hint of anger flashed across Stern's face. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Stern raised a hand and dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. Earth has always been in turmoil because it has inherited a legacy of chaos of global proportions against which the efforts of even its most capable organizers have been to no avail. Is that the future that you would wish upon Chiron?. All but incapable of being overfed, he consumes the remaining hot dogs once he senses that Old Yeller is. Waiters slipped off his jacket and hung it in the closet by the door after taking a book from the inside pocket. Fallows frowned but made no comment.. Lechat was nodding slowly to himself. "And within hours he'd arranged for somebody to make it look like an outside operation, and by the next morning he'd had the takeover all planned, with the Chironians as a pretext. Everything fits. But who would have done it?". "What's that?". "All of them." Shirley sounded mildly surprised. "What do you mean by 'basically'?"..under the chest of drawers..Kath had moved away to talk to Adam, Casey, and Veronica, who were sitting together beyond the table at which Driscoll was performing. Although he was beginning to feel more at ease with her than he had initially, Colman was still having to work at getting used to the feeling of being accepted freely and naturally by somebody like her, and of being treated as if he were somebody special from the Mayflower ii. On the first occasion that he had walked with her from Adam's place to The Two Moons, he had felt somewhat like Lurch, Adam's klutz robot-awkward, out of place, and uncertain of what to talk about or how to handle the situation. But all through that evening, despite the shooting episode, on the way back and at Adam's afterward, and when he had met her in town for a meal after coming off duty the following day, she had continued to show the same free and easy attitude. Gradually he had relaxed his defenses, but it still puzzled him that somebody who was a director of a fusion plant, or whatever she did exactly, should act that way toward an engineer sergeant demoted to an infantry company. Why would she do something like that? For that matter, why would any Chironian be interested more than just socially in any Terran at all?. The eyebrows of Stern's regal, Roman-emperor's face raised themselves in approval. "I see the subject is not unfamiliar to you. My compliments. Regrettably, rareness of quality is not confined to grapes.".Farrel.".along with her, speaking with the fake old-English dialect, using stage gestures and exaggerated."Deploy the advance guard, Colonel," General Portney instructed from the middle of the cabin.
